Alin Balan

I'm an experienced and easily adaptable developer that has worked on multiple projects and used multiple technologies. Because of this vast experience I can create the optimal architecture for the project and choose the best technologies to achieve the desired goal.

WORK EXPERIENCE

CTO

Jan 2016 - Present

Magtech Solutions, Bucharest

During this time, I was working on multiple projects of different size and complexity that added to my knowledge and skills. Some examples of complex websites are:

A Magento 2 platform that can handle high changes in traffic by scaling up and down as a response to instant social media promotions streamed by the website star.

A Magento 2 platform that was selling highly customizable jewelry with 3d visual display of the designed jewelry.

Senior Developer

Nov 2014 - Jan 2016

Altex, Bucharest

Worked on internal developed ecommerce M1 website that was running on multiple frontend nodes and a load balancer for splitting the trafic.

Some of the things that I worked on was to develop a full page cache system based on varnish to improve the response time and to allow custom non cached sections for customers.

Among the technologies used were : PHP, Varnish, New Relic, Mysql,

Senior Developer

Mar 2014 - Oct 2014

Optaros, Bucharest

Key responsibilities:

Working as a Senior Developer in a team of 10 people for a world wide magento 1 project for Nestlé, the project had different integrations for each country with different shipping methods, payment methods, ERP systems and other third party systems.

Team Leader/CTO

Aug 2011 - Mar 2014

Innobyte, Bucharest

LANGUAGES

English

Highly proficient in speaking and in writing

Romanian

Native

Key responsibilities:

Managing a team of 5 developers

Project estimations along side the team and distributing tasks based on the requirements and the expertise held by the team members.

Improving the company working procedures.

Software Engineer

Feb 2011 - Aug 2011

Machteamsoft, Bucharest

Developer

Sep 2007 - Feb 2011

Estinvest, Focsani

Key responsibilities:

System administrator

Developing and supporting a trading platform connected to the BVB using a java application to pull and push trading stock information.

STUDIES AND CERTIFICATES
